

Peanuts

Our products are carefully selected and certified

The peanut is a legume crop, also known as groundnut, grown mainly for its edible seeds, classified as *Arachis hypogaea*, originating in South America (Brazil, Paraguay, Bolivia and Argentina).

The Runner peanut type was introduced in Brazil in 2002 and has been cultivated in the state of Sao Paulo. It is known for its uniform, medium-sized kernel, mainly used for exports and preferred by the industries of peanut candies, peanut butter and snack nuts.

Important information:

All the products are carefully selected and endorsed by a third party lab, a FOSFA (*The Federation of Oils, Seeds and Fats Associations Ltd*) member superintendent. The food safety management system complies with the FSSC 22000 certified by DNV GL Business Assurance B.V. .
